**Trinseo Offers Opalescent Acrylic Sheet with 90 Percent Light Transmission
Best-In-Class Material Targets Designers, Architecture & Construction Industry**

Horgen, Switzerland– June 22, 2021 – [Trinseo](#) (NYSE: TSE), a global materials solutions provider and manufacturer of plastics, latex binders and synthetic rubber, announced the launch of its new opalescent acrylic sheet with 90 percent light transmission - ALTUGLAS™ Opalescent HLT. This material addresses a need from designers and the architectural and construction industries for an acrylic glass that offers an aesthetically pleasing opalescent quality along with high light transmission (HLT).

“Designers continue to replace traditional materials with acrylic glass for its many benefits and are constantly looking for new properties that allow them to stand out in their designs,” said Michel Brendel, Vice President PMMA EMEA & Global Methacrylics, Trinseo. “With ALTUGLAS™ Opalescent HLT we offer balanced properties to achieve optimal diffused aesthetics while maximizing light transmission.” Generally, when diffusivity increases, light transmission decreases. With ALTUGLAS™ Opalescent HLT this is not the case. The product provides a premium, milky or cloudy appearance, as well as exceptional lighting efficiency with both cost and sustainability benefits, such as recyclability and durability.

Other features include:

- High diffusion, to conceal the light source and prevent hot spots
- Ability to place LEDs can be placed up to the edge of an application
- Light source (LED) color is transmissible through the material
- Material available with neutral, milky appearance, maintaining its true color without a light source

ALTUGLAS™ Opalescent HLT sheet can be used for signage, decorative lighting, privacy screens, and illuminated panels and can be made in range of thicknesses from 3 mm to 30 mm based on the needs of an application. Custom colors are also available and can be specially formulated by our color specialists.

Trinseo supports a wide range of industries in Europe and Asia Pacific with its ALTUGLAS™ polymethyl methacrylates (PMMA) including Architecture & Construction, Automotive, Medical, Electronics and Consumer Goods. The ALTUGLAS™ brand name has been known and trusted by customers for 64 years.

Trinseo also offers PMMA in North America, marketed under the brand name PLEXIGLAS®.

About Trinseo

Trinseo (NYSE: TSE) is a global materials solutions provider and manufacturer of plastics and latex binders with a focus on delivering innovative, sustainable, and value-creating products that are intrinsic to our daily lives. Trinseo is dedicated to making a positive impact on society by partnering with like-minded stakeholders, and supporting the [sustainability](#) goals of our customers in a wide range of end-markets including automotive, consumer electronics, appliances, medical devices, packaging, footwear, carpet, paper and board, and building and construction. Cautionary Note on Forward-Looking Statements

This press release may contain forward-looking statements including, without limitation, statements concerning plans, objectives, goals, projections, strategies, future events or performance, and underlying assumptions and other statements, which are not statements of historical facts or guarantees or assurances of future performance. Forward-looking statements may be identified by the use of words like "expect," "anticipate," "intend," "forecast," "outlook," "will," "may," "might," "see," "tend," "assume," "potential," "likely," "target," "plan," "contemplate," "seek," "attempt," "should," "could," "would" or expressions of similar meaning. Forward-looking statements reflect management's evaluation of information currently available and are based on our current expectations and assumptions regarding estimated and future results of operations, business strategies, competitive position, industry environment and potential growth opportunities and cost synergies relating to the acquisition of the MMA and PMMA businesses from Arkema S.A.; our business, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. Factors that might cause such a difference include, but are not limited to, our ability to successfully integrate the acquired MMA and PMMA businesses, generate expected cost savings and synergies, maintain relationships with customers, retain key employees and profitably grow the business; and those factors discussed in our Annual Report on Form 10-K, under Part I, Item 1A — "Risk Factors" and elsewhere in our other reports, filings and furnishings made with the U.S. Securities and Exchange Commission from time to time. As a result of these or other factors, our actual results may differ materially from those contemplated by the forward-looking statements. Therefore, we caution you against relying on any of these forward-looking statements. The forward-looking statements included in this press release are made only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise, except as otherwise required by law.
